

# Field Crops

pest management manual

Revised  
Revamped  
**Revolutionized**

The 2000 revision of the *Field Crops Pest Management Manual* (IPM-1) has been dramatically improved for those involved in crop troubleshooting or field scouting, and contains descriptions, scouting procedures, and management guidelines (many new or updated) for insect, weed, disease, nematode, and vertebrate pests of corn, soybeans, alfalfa, grain sorghum, and small grains. Problem diagnostic guides for each crop, as well as keys to the identification of insect and weed pests are included. Over 400 new color and 100 black and white photographs are embedded in the text to enhance usefulness of this 550 page manual. "IPM Tips" are placed throughout the manual to assist in pest knowledge and plant/pest interactions. Physical improvements include an easy to use 3-ring binder, a laminated black cutworm instar guide, and page reinforcement. This is the most comprehensive publication of its kind and is a must for those making pest management decisions.
